PREFATORY NOTE

This index undertakes to deal only with the printed reports of administrative officers, legislative committees, and special commissions of the states and with governors' messages for the period since 1789. It does not refer to constitutions, laws, legislative proceedings or court decisions, except in so far as they happen to be found in the class of documents above mentioned. It attempts, on the other hand, to furnish a list, as complete as possible, of all the documents and messages which fall within its scope, in whatever form they may have been published, whether separately, in collected documents, legislative journals, proceedings and documents of constitutional conventions or volumes of laws, and to indicate the volume in which they may be found. Unless otherwise indicated the material indexed is in the New York Public Library. In some cases reference is made to reports and messages prior to 1789, and to publications other than public documents which it was felt would be helpful to those likely to use the index but no claim to completeness is made except in the case of the documents and messages since 1789. In addition to furnishing a list of reports and messages, the index undertakes to supply a reference by volume and page to all material of economic importance which they contain, with the exception of that contained in the reports of bureaus of labor. The reason for this exception is that these reports have already been indexed by Carroll D. Wright, late United States Commissioner of Labor,[1] in a volume published by the Department of Labor in 1902. Although the index is confined to matter of economic bearing, the term " economic " has been given a broad interpretation. In view of this liberal interpretation it is believed that the index will constitute a useful addition to the resources of students of almost any aspect of American history.

It will be seen that the present index differs both in scope and character from R. R. Bowker's " State Publications," the valuable pioneer work in this field. It is narrower in scope than " State Publications " which aims to present a list not only of reports and governors' messages but of all state documents; but in the field which the present work covers it contains not only a more complete list of documents than has hitherto been published but also an index of their contents in so far as these have an economic bearing.

Each volume is divided into two parts. Part I contains references to general sources of information and descriptive matter found in the documents and to general indexes and other reference material relating to N. Y. state documents. Part II contains references to particular series of reports, and particular topics, arranged alphabetically by topics. The references under each topic are divided into two groups, viz.,

[1] Index of all reports issued by bureaus of labor statistics in the U. S. prior to Mch. 1, 1902. Wash., 1902. 287 pp. 8°.

" serial " and " non-serial." Within each of these divisions the arrangement is chronological. Anyone desiring information on any particular topic will, therefore, look for that topic in its alphabetical order in Part II. Numerous cross-references will, it is hoped, make it possible to discover with little difficulty all the material bearing on that topic.

Uniform entry words for subjects recurring in different states will be retained throughout the series. It will thus be possible to make a study not only of the historical development of an economic subject as reflected in the documents of an individual state but also to make a comparative study of that development as it has taken place in the country at large. To accomplish this purpose it has been necessary to make the selection of entry words without reference to the peculiarities of local usage, such peculiarities being recognized in the case of each state by cross-references. Unless otherwise stated the size of the books is octavo. It is believed that the abbreviations used are sufficiently obvious, or familiar, not to make a table of them necessary.

The present volume is confined to the economic material contained in the printed reports of administrative officers, legislative committees and special commissions of the State of New York and in the messages of the governors of that state. This volume has been preceded by similar volumes devoted to the states of Maine, New Hampshire, and Vermont, and will be followed by similar volumes devoted to other states. The work when completed, will, therefore, furnish an index to the economic material in the reports and governors' messages of all the states of the Union.

A feature introduced in the New York part of this index, and not employed in any of the preceding parts, is the system of references to topic from locality. This feature will be retained in succeeding parts. The advantage, particularly in a state as great, both geographically and economically, as New York, is obvious. By locality is meant any one of the political or natural divisions of the state, as county, town or city, see for instance New York City, and rivers, lakes, etc., see for instance Hudson River. References from the names of foreign countries have also been made where mention has been found of any phase of the economic activities of such countries, see for instance Austria.

COLLECTED DOCUMENTS.

Although it is certain that no collected documents were made up into volumes prior to those four volumes of 1830 entitled Legislative Documents, earlier numbered Senate and Assembly Documents are found. The journals up to and including 1829 are folio volumes, and from 1820, contain, in the body of the text as well as in the appendices, those reports later found in the documents. No evidence has been found that the documents contained in the appendices to the folio journals, although these are in most cases lettered or numbered consecutively, were separately printed in folio. In a few instances, noted in their proper places in the body of this index, octavo reprints of a folio appendix were made. In 1829 the documents were for the first time authorized to be issued in octavo form. This change was made pursuant to Senate resolution of April 25, 1829 (Sen. jol. Jan. 1829: 516), which provided that during the remainder of that session governor's messages, reports, and other communications made to the Senate or Assembly should be printed in octavo form. Unless otherwise ordered the "usual" number, i. e. 500 copies, were so printed. The journals, which heretofore had been folio volumes, were also issued in octavo form in 1830 and ever after, excepting an occasional quarto issue. The collation given below of the collected documents does not show extra or special sessions of the legislature. Proceedings of such sessions are, as a rule, contained in the journals of the next preceding regular session. The following list is intended to be of volumes not sessions.

The serial numbers assigned to the following volumes begin with No. 28. Numbers 1 to 27 are for the Senate and Assembly journals of the first twelve sessions after assumption of statehood. These sessions covering the years from 1777 to March, 1789, antedate the period covered by this index. One number has been allowed for each journal having a title page. Sometimes journals may be found bound together in one volume, in which case librarians may affix to the volume the serial numbers required for each journal.

These serial numbers are an arbitrary assignment on the part of the compiler and are intended to serve the same purpose which make the serial numbers applied to federal documents useful to librarians.

The collected documents of New York State vary from those of most other states in that they carry an index to all the volumes of a session in each volume of the Assembly and Senate documents respectively. This index first appeared in 1841. There is no table of contents of the volumes at any time.

LEGISLATIVE MANUALS

Civil List

The New York Civil List, containing the names and origin of the civil divisions and the names and dates of election or appointment of the principal state and county officers, from the Revolution to the present time. Compiled from the public records in the office of the secretary of state, and other authentic sources. Albany, 1855-1889.

1855 was first issue. From 1855 to 1863 list was compiled by Franklin B. Hough, corresponding member of New York Historical Society. From 1864 to 1882 compiled by Stephen C. Hutchins and from 1883 to 1888 by Edgar A. Werner. Issued annually. The matter usually contained in the lists is an account of the forms of govt. of the colony and state, with notes on various governmental organizations, lists of principal colonial, state, and county officers; and electoral statistics, the whole arranged in constitutional periods. Among the more important of the improvements begun in 1864 are the extended analysis of the judicial systems of the colony and state; list of residents of New York State who held positions under the federal govt., and the addition of a dept. relating to colonial affairs prepared by Dr. E. B. O'Callaghan.

Manual for the Use of the Legislature

Manual for the use of the legislature of New York, 1816-1904. Albany, 1816-1904. 24°, 16°, and 8°.

This manual is not to be confounded with two similar publications, backtitled Rules and Orders and Red Book resp., of which copies were issued during the decade of the thirties. Although the publisher was the same in both cases, it is not believed that the Rules and Orders or the Red Book were strictly official. The collation of the series of the Manual as given in Bowker and which was supplied by the State Library begins with 1826. There is a copy for 1816, compiled by A. Clark, as was also the issue for 1826, in The New York Public Library. There were no intervening issues. The manual for 1826 is called on the title page "second edition," viz. second edition of the manual of 1816. The manual contains, in addition to copies of the state and federal constitution, lists of committee, Senate and Assembly rules, etc., and banking, finance, insurance and canal statistics. In later years the directories of department officials and the statistics referred to are quite full. The statistical matter has been indexed in its proper places in part 2 of this volume.

LEGISLATIVE RECORD

The Legislative Record of the state of New York . . . . pursuant to ch. 58, laws of 1888. n. p. n. d. 1888-1889. v. 1-2. 4°.

No more published. Debates and proceedings in full.

Board of City Magistrates

The bd. of police justices had its origin in the act of March 2, 1798, ch. 24, and of the act of March 21, 1800, ch. 35, which established a police office in the city, with two justices and a clerk, to be appointed in the character of special justices to that duty. The first printed report was made in 1874. On June 30, 1895, the bd. of police justices was abolished, and in its stead was established the bd. of city magistrates.

Bulletins

1885-1904. Bulletins, 1-260. Geneva, 1885-1904.

Previous to July, 1885, bulletins in the form of slips had been distributed to newspapers and to individuals to a limited extent. In July, 1885, the first no. of a so-called new series was issued. Not many nos. had been issued when publication was suspended to be resumed in Aug. 1888 with the issue of no. 10. Publication from this time has been uninterrupted. In recent years bulletins have been reprinted in the ann. repts. A collation of these reprints is as follows:

American Institute

Annual Report

Incorporated May 2, 1829. Under act of May 5, 1841, "to promote agriculture," the Institute became a state beneficiary. New York co. was excepted from apprns. made under that act to the state socy. and to the counties, and its apprn. was made over to the Institute. The Institute thus measurably took the place of the N. Y. co. agric. socy. From 1841 the Institute maintained an open exhibition of models, etc., of improvements in mnftures., agriculture and the arts.

In compliance with a resolution adopted in the U. S. House of Representatives on July 10, 1832, the Secretary of the Treasury laid before the next and each succeeding session of Congress until 1863, statements, or returns, showing the capital, circulation, discounts, specie, deposits, etc., of the different banks and banking companies as were submitted to the respective legislatures and governors of the several states within the year. Where these statements could not be obtained, such other information as would best supply the deficiency was required by the resolution to be presented. Such annual reports as were presented to and printed by the U. S. in consequence of the above resolution, have been added to the entries for the annual reports printed by the state.

BANKS: INDIVIDUAL BANKS

Banks of Discount

In using the following repts. of individual banks attention is directed to series 1 under the serial group of reports above. In the reports of this series are included the returns of those individual banks which were by law required to report to the comptroller within a given time. As the no. of banks increased from year to year, and as some banks were delinquent in making the returns, thus necessitating separate publication, it will be necessary to supplement the comptroller's repts. and the individual repts., listed below, with each other in order to get a full record of the published bank returns before 1830.

BRIDGES

It is realized that, from the engineering standpoint, the following classification of bridges has little value. For the purposes of this index, however, it was believed that a regional classification, indicating the direction of the progress of this branch of improvements, would be the more useful.

1812. Rept. praying grant of lottery for erection of bridge over Cayuga lake and protest of Cayuga Bridge co. agst. same. (Assem. jol. 35 sess. 1812: 168-169.)

The journals of the legislature do not show any apptmts. under this law. The act was superseded by one passed April 20, 1825, directing the governor and Senate to appoint two freeholders to act with any one of the canal commissioners as appraisers. By an act passed May 10, 1836, three appraisers were to be appointed by the governor and Senate for a term of two years. The bd. remained thus constituted until 1857 when their term was extended to three years. By an act passed April 7, 1883, the office was abolished and its records transferred to the Bd. of Claims created by the same act. The first annual report was made under provision of ch. 352, laws of 1849.

Wherever expedient tonnage material has been included in this group. Owing to the make-up of the material this has not always been possible, and some tonnage material is necessarily to be found under Canals, see that title, and principally the sub-group, Tolls, etc. The distinction which it has been the intention to make, is to place all material relating to the movement of goods on canals under commerce, and to keep only that material which affects the state's financial interest in the canals under Canals, this latter as having an immediate bearing on receipts of and expenditures for canals.

Committee on Ways and Means

The following repts., as well as those of the committee on finance, listed immediately thereafter, furnish material for a general survey of the financial policy of the state. For this reason it was thought best to keep them together in a serial group, rather than to scatter them through the dated non-serial group. No trace was found which might account either for their having been first made, or after having been made, evidently with great care, for their having been discontinued.

1872. Ann. rept. of comrs. of state parks of the state of N. Y., 1. Albany, 1873.

No more published.

In Sen. docs. 1873, v. 4: 102.

There are three editions of this report, viz., Albany, Argus Co. prtrs., 1873, 23 pp. Albany, Weed, Parsons & Co., 1874, 22 pp., and the pamphlet, without title page, as bound in the Senate docs. All the editions have the Sen. doc. number. The Weed, Parsons edition has a note saying that 2000 copies of the report were printed for the use of the Assembly and 2000 copies for the use of the comrs. The report is largely a plea for the state ownership of the Adirondack region for purposes of forest preservation.

1 survey

By Assem. res. of April 18, 1835, the Secy. of State was requested to rept. to the Legislature at its next session, the most expedient method of obtaining a complete geological survey of the state. Secy. of State John A. Dix made the desired rept. as shown below. On April 15, 1836, an act was passed to provide for a geological survey. Under this act repts. were made to the governor and transmitted annually by him as shown below.

——. Source, description, and utilization of garnet in N. Y. state. (N. Y. state museum bull. 15: 553-555.)

GNEISS

1836. Remarks on gneiss of Mohawk Valley. (Assem. doc. 161 (pp. 158-160), 1837 v. 2.)

GRAPHITE

1895. Produce of graphite in Ticonderoga. (N. Y. state museum bull. 15: 552.)

GYPSUM

1895. Distribution and utilization of gypsum. (N. Y. state museum bull. 15: 550-551.)

HEMATITE ORE

1889. Hematite ores of St. Lawrence and Jefferson cos. (N. Y. state museum bull. 7: 10-11.)

IRON

1836. General remarks on specular oxide of iron. (Assem. doc. 161 (p. 136), 1837 v. 2.)

——. Extent and thickness of beds of magnetic oxide of iron. (*Same* 161 (p. 129), 1837 v. 2.)

——. Description of red oxide of iron and associated strata of 3d geol. distr. (*Same* 161 (pp. 176-177), 1837 v. 2.)

——. Remarks on geol. situation and associated rocks of magnetic oxide of iron. (*Same* 161 (pp. 127-128), 1837 v. 2.)

——. Description of ores of iron. (*Same* 161 (pp. 18-42), 1837 v. 2.)

——. Ores generally used in mnftre. of iron. (*Same* 161 (p. 17), 1837 v. 2.)

——. Description of iron ores found in 2d geol. distr. (*Same* 161 (pp. 127-150), 1837 v. 2.)

——. Local details re. magnetic iron ore of 2d geol. distr. (*Same* 161 (pp. 129-134), 1837 v. 2.)

——. Origin of magnetic iron ores. (*Same* 161 (p. 134), 1837 v. 2.)

——. Origin of specular ore. (*Same* 161 (p. 138), 1837 v. 2.)

——. Local details re. specular iron ores. (*Same* 161 (pp. 137-138), 1837 v. 2.)

——. Extent and thickness of beds of specular iron ore. (*Same* 161 (p. 136), 1837 v. 2.)

——. Geol. situation of specular iron ore and associated rocks. (*Same* 161 (p. 136), 1837 v. 2.)

1837. Rept. on iron ores of Columbia and Dutchess cos. (*Same* 200 (pp. 181-184), 1838 v. 4.)

1839. Rept. on iron ores of northern cos. (*Same* 50 (pp. 47-48), 1840 v. 2.)

NATURAL RESOURCES—cont'd

non-serial

The work of the comrs. of emigration and of the comrs. of quarantine is, in N. Y. State, so closely allied that a perfect classification of both, without much duplication of entries is not possible. Users of this index are therefore cautioned to look over the material under both groups, in studying either the emigration or quarantine systems of N. Y. State. See p. 454.

The work of the comrs. of emigration and of the comrs. of quarantine is, in N. Y. State, so closely allied, that a perfect classification of both, without much duplication of entries, has not been possible. Users of this index are therefore cautioned to look over the material under both groups, in studying either the emigration or the quarantine systems of N. Y. State. See p. 440.

1879. Proc. of the special committee on r.rs. apptd. under Assem. res. [of Feb. 28, 1879] to investigate alleged abuses in the mngmt. of r.rs. chartered by the state. N. Y., 1879. 5 v.

The "Hepburn Committee." The committee held extended sessions during the summer and autumn of 1879 and made its rept. to the Assembly of 1880. The rept. of the committee is in v. 3, Assem docs. 1880, docs. 38 and 61. The testimony taken before the committee has never been printed in the series of collected docs. An edition of 100 copies was printed during the sessions of the committee for its use and the use of counsel and prominent r.r. officers. This testimony when collected is usually collected into 5 vols. Sets of the testimony are now difficult to procure. There is a set in the N. Y. Public Library. This set once belonged to Simon Sterne, counsel to the committee, and, because of the scarcity of the volumes, and the authoritative make up of this set, a collation, in full, of it is given here.
